Freelance: bionluk.com/unzilenurkaya

4th-year Management Information Systems (MIS) student with hands-on experience in Python automation, machine learning, and front-end development across startup, agency, and corporate internship environments. Proficient in data analysis (Pandas, Power BI), predictive modeling (Scikit-learn, XGBoost), and REST API-oriented development. Seeking a data-driven developer or analyst role bridging business processes and technology.

EDUCATION

Management Information Systems - Bachelor's Degree *September 2022 - June 2026*

Bandirma Onyedi Eylul University

MIS Community - Sponsorship Team Member

EXPERIENCE

IT (Information Technology) - Mandatory Internship *July 2025 - August 2025*

Celebi Bandirma Port, Balikesir

- Designed and prototyped a Python-based timesheet automation module targeting 100+ daily employee records, reducing manual matching effort by an estimated 60%.
- Performed data cleaning and shift deviation analysis on 100+ daily turnstile entry/exit records using Pandas; delivered structured Excel reports to HR.
- Mapped corporate network topology and server infrastructure; documented IT incident resolution workflows.
- Leveraged LLM tools (ChatGPT) for code review and algorithm optimization, accelerating development iteration cycles.

Software Developer *August 2024 - December 2024*

Uyu Sleep Capsule, Istanbul

- Contributed to Agile product development meetings in the startup ecosystem, actively participating in software life cycle processes.
- Implemented and tested data synchronization protocols between embedded systems and the web panel.
- Developed modular software components and optimized system structure using Python and C#.
- Executed software test scenarios and managed bug tracking processes.

Front-End Developer *July 2024 - August 2024*

KMA Yazilim, Isparta

- Designed responsive and user-friendly interfaces for more than 3 projects using HTML, CSS, and JavaScript.
- Adapted to intra-team code management processes by actively using the Git version control system.
- Conducted user experience (UX) tests and implemented interface improvements.

PROJECTS

Timesheet Automation System
Python, Pandas, Openpyxl

Developed a prototype that optimizes the manually executed data matching and shift control process using Python automation, targeting over 100 daily records.

Hotel Reservation Cancellation Prediction
Python, Scikit-learn, XGBoost, Streamlit

Built a hotel booking cancellation prediction model using XGBoost and Scikit-learn on a 36,000+ row Kaggle dataset. Achieved 87% accuracy after performing EDA, feature engineering, and hyperparameter tuning. Deployed an interactive demo via Streamlit.

Stray Animals Automation System
TUBITAK 4006 Science Fair

Designed and developed a prototype unit that provides food for stray animals, inspired by coin-operated mechanical vending machine systems.

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, JavaScript
- **Programming:** Python, SQL, C#
- **Data Analysis:** Pandas, Excel, Power BI
- **Artificial Intelligence / ML:** Machine Learning, Scikit-learn, XGBoost, Prompt Engineering
- **Tools:** Git, GitHub, Streamlit
- **Office:** Excel, Word, PowerPoint

COURSES AND CERTIFICATIONS

- Learning SQL with Applications - **Udemy**
- Algorithms and Programming with C# - **Turkcell Gelecegi Yazanlar**
- Effective Communication with AI: Prompt Engineering - **Bandirma Onyedi Eylul University**
- Tubitak Erguvanlar Cicek Aciyor (Project Participation) - **TUBITAK**
- Reporting Training - **Is Kulubu Dernegi (Business Club Association)**
- Current Developments in the Banking Sector - **Banks Association of Turkey**
- Project Management - **BTK Academy**

LANGUAGES

Turkish: Native
English: Intermediate (B1-B2) *(Actively advancing)*
